Blending logic with creativity to build efficient web solutions with user-focused design. A passionate MERN stack developer with strong foundations in HTML/CSS, React js, JavaScript, and database systems (MySQL/MongoDB). Currently seeking a final-year internship to complete my Master's while contributing technical skills and problem-solving abilities to develop scalable applications.

Skills

- PHP
- MySQL
- React Js
- Tailwind CSS
- Python
- HTML
- CSS
- Node.js
- JavaScript
- MongoDB

Professional Experience

MERN Stack Developer

Candid Devs Pvt. Ltd. -Mehsana
Aug 2025 – Present

- Working on full-stack web applications using MongoDB, Express.js, React.js, and Node.js based on real client requirements.
- Developing responsive frontend interfaces using React.js and Tailwind CSS for scalable production systems.
- Designing and integrating RESTful APIs for seamless frontend–backend data communication.
- Managing MongoDB databases including schema design, queries, and performance optimization.
- Collaborating with development teams for debugging, feature implementation, and deployment of live applications.

Ph.D. Management Module

Hemchandracharya North Gujarat University

Team Leader & PHP Developer
Jan 2026 – Present

- Led the design and development of a centralized Ph.D. Lifecycle Management System to digitize scholar processes including admission, guide allocation, coursework, RDC, and viva.
- Developed backend modules for scholar registration, document verification, research progress tracking, and approval workflows using PHP & MySQL.
- Designed normalized database schemas to manage scholar, guide, research committee, and academic milestone data efficiently.
- Implemented role-based access control for administrative staff to manage applications, approvals, and academic records.

- Replaced manual record handling with a centralized digital system, improving administrative workflow and data management efficiency.

In-House

BidLaunchPad-Online Auction System

- Developed a comprehensive web-based online auction platform to facilitate secure and real-time bidding of products between users.
- Implemented core functionalities such as user registration, product uploading, admin approval of products, real-time bidding system, bid tracking, and winner declaration.
- Designed an admin approval mechanism where products submitted by users must be verified and approved before participating in the bidding process.
- Integrated real-time bid updates using Socket.IO to notify users when another participant places a higher bid on the same product.
- Provided administrative controls for managing users, approving products, monitoring bids, and overseeing auction results.
- Technologies used: **MongoDB, Express.js, React.js, Node.js (MERN Stack), Socket.IO, Tailwind CSS, JavaScript**

Event Management System

- Developed a comprehensive system to streamline event planning and coordination.
- Implemented features for managing service providers, contact details, and event scheduling.
- Technologies used: HTML, PHP, MySQL, CSS, JavaScript.

CV Generator Chrome Extension

- Developed a browser extension enabling users to create professional resumes with customizable templates.
- Integrated jsPDF for dynamic PDF generation supporting multiple layouts and real-time preview.
- Ensured secure and responsive design following Chrome Manifest V3 standards.
- Technologies used: HTML, CSS, JavaScript, jsPDF, Chrome Extensions API.

Article Website

- Created a responsive website using HTML and CSS.
- Focused on implementing a wide range of HTML tags to build a functional and visually appealing site.
- Technologies used: HTML, CSS.

Education

JUN 2024 - PRESENT

M.Sc.(C.A.&I.T.) - Department Of Computer Science & Information Technology, HNGU, Patan

AUG 2021 – JUN 2024

B.Sc.(C.A.&I.T.) - Department Of Computer Science & Information Technology, HNGU, Patan

CGPA : 7.4
