PROFESSIONAL SUMMARY

As an MCA student with hands-on experience in AI/ML research, full-stack web development, and data analysis. Proven ability to design end-to-end machine learning pipelines using Python and deep learning frameworks. Research intern at ISRO SAC with expertise in signal processing, CNN/LSTM model training, and spectral analysis. Strong foundation in backend and frontend development with a collaborative and problem-solving mindset.

EDUCATION

Master of Computer Applications (MCA) – Pursuing	May 2026
Acharya Motibhai Patel Institute of Computer Studies, Ganpat University	
Higher Secondary Certificate (HSC) – GSEB 80.28%	March 2020
Shri M.M.V Sarvajani Kanya Vidhyalaya	
Secondary School Certificate (SSC) – GSEB 82.67%	March 2018
Shri M.M.V Sarvajani Kanya Vidhyalaya	

TECHNICAL SKILLS

Programming Languages: Python, Java
Frontend Development: HTML5, CSS3, Bootstrap
Backend Development: Python, Django
Machine Learning / AI: Deep Learning, CNN, LSTM, Signal Processing, Spectral Analysis, Data Visualization
Databases: SQL, SQLite, Firebase
Tools & Platforms: GitHub, VS Code, Microsoft Azure
Soft Skills: Leadership, Communication, Problem Solving, Team Collaboration, Punctuality, Bias for Action

EXPERIENCE

AI/ML Research Intern – Lunar Seismic Data Analysis	1 st Oct 2025 – 31 st Mar 2026
ISRO Space Applications Centre (SAC), Ahmedabad	
- Designed and implemented an end-to-end signal preprocessing pipeline (demeaning, 3-sigma despiking, step-noise correction) for lunar seismic data from Chandrayaan-3. - frequency-domain feature extraction and noise modeling. - Trained CNN and LSTM models for moonquake classification and time-series anomaly detection achieving high accuracy. - Conducted sampling integrity validation and multi-sensor data correlation for enhanced seismic event interpretation.	
Data Science Virtual Intern	Self-Paced
Cisco Networking Academy	
Completed Introduction to Data Science course covering data analysis fundamentals, Python for data science, and visualization techniques.	

PROJECTS

Signal Processing – Analysis of Chandrayaan-3 Seismic Data Python, Deep Learning, CNN, LSTM
- Built a complete ML pipeline for lunar seismic activities for pre-processing using ISRO Chnarayaan 3 mission data. - Applied PSD/ASD spectral analysis for frequency-domain feature extraction to distinguish moonquake events from background noise. - Achieved high-accuracy anomaly detection using ML models on time-series lunar seismic data.

HomeBasket – Online Grocery Mart | HTML, CSS, Python-Django, Firebase

- Developed a full-stack e-commerce platform enabling users to browse, order, and purchase groceries online with seamless checkout experience.
- Built an admin dashboard with real-time stock monitoring, automated billing, and detailed sales analytics for efficient inventory management.
- Integrated Firebase for real-time database operations and implemented secure authentication for users and administrators.

CERTIFICATIONS

- Azure AI Fundamentals (AI-900) – Microsoft
- Programming Fundamentals Using Python
- Data Visualization Recipes with Python and Matplotlib 3

ACHIEVEMENTS & CO-CURRICULAR ACTIVITIES

- Winner – Girls Inter-College Chess Tournament (2025)
- Participant – National Level Talent Search Examination (2016 & 2017)
- Participant – KHELE GUJARAT State-Level Summer Coaching Camp in Swimming
