Summary

Senior WordPress Developer with 6+ years of experience building, customizing, and rescuing high-quality WordPress and WooCommerce websites, with 40+ sites delivered end-to-end. Specialize in custom theme and plugin development, performance optimization, and converting Figma/Adobe XD designs into clean, standards-compliant code. Own the full development lifecycle from architecture to deployment, with a track record of shipping stable, scalable, and SEO-ready sites and mentoring junior developers.

Technical Skills

WordPress: Custom theme and plugin development, complex customization, WordPress Coding Standards (WPCS), Composer dependency management

E-commerce: WooCommerce development (product setup, checkout flows, payment gateway integration)

Blocks: Custom Gutenberg block development with ACF

Frontend: HTML5, CSS3, JavaScript, jQuery, responsive and accessible (WCAG) layouts

Backend & APIs: PHP, MySQL, third-party API integration, custom WordPress REST API development

Design to Code: Pixel-perfect conversion from Figma and Adobe XD

Page Builders: Elementor, WPBakery, Divi, Bricks Builder (custom widgets and layouts)

Performance & SEO: Core Web Vitals optimization, caching, image optimization, on-page and technical SEO

Security: WordPress hardening, updates, backups, and vulnerability remediation

Workflow & Tools: Git, GitHub, CI/CD deployments, staging environments, Agile/Scrum (Jira, monday.com, Trello)

Professional Experience

Freelance WordPress Developer

Jan 2026 - Present

Self-Employed

- Partner with agencies and product businesses to deliver custom WordPress and WooCommerce solutions, managing 3+ concurrent projects end-to-end across discovery, build, and launch.
- Recover underperforming sites for 5+ clients by auditing plugin conflicts and refactoring render-blocking code, cutting page-load times by up to 40% and restoring passing Core Web Vitals.
- Stabilize inherited codebases through WPCS-compliant refactors and Composer-managed dependency cleanup, reducing recurring bugs and post-handoff issues.
- Communicate directly with stakeholders to scope requirements clearly and keep projects stable and maintainable over time.

Senior WordPress Developer

Nov 2024 - Dec 2025

NineGravity, Ahmedabad

- Led architecture and technical execution of 15+ WordPress builds from planning to deployment, using reusable component libraries and standardized Git/CI/CD workflows.
- Improved Core Web Vitals and page-load performance across client sites through asset optimization, caching, and elimination of render-blocking resources, raising Lighthouse scores into the passing range.
- Built and maintained custom themes and plugins in PHP/MySQL with ACF-powered Gutenberg blocks, following WPCS for clean, maintainable code.

- Debugged and eliminated complex plugin conflicts and performance bottlenecks, improving overall site stability and reducing client-reported issues.
- Applied security hardening and technical SEO best practices across 15+ client sites to protect against common vulnerabilities and support search visibility.
- Collaborated with designers, project managers, and QA in Agile/Scrum sprints to deliver solutions aligned with business goals.

Senior WordPress Developer

Feb 2021 - Nov 2024

Silver Webbuzz Pvt Ltd, Ahmedabad

- Delivered 30+ WordPress and WooCommerce projects end-to-end, owning development through deployment.
- Engineered custom themes and plugins from scratch with responsive, accessible, user-friendly designs.
- Worked directly with clients to gather requirements and deliver solutions aligned with expectations, reducing revision cycles through clearer scoping.
- Optimized websites for speed, scalability, and cross-browser compatibility, and implemented on-page and technical SEO to improve performance and search rankings.
- Troubleshoot and corrected WordPress issues including theme errors, plugin conflicts, and performance concerns.
- Mentored and supported 3 junior developers through development tasks and technical troubleshooting.

Junior WordPress Developer

Nov 2019 - Feb 2021

Alian Software, Ahmedabad

- Created and customized responsive WordPress themes using HTML5, CSS3, JavaScript, and jQuery, contributing to 10+ client launches under senior guidance.
- Developed reusable layouts with Elementor, WPBakery, and Divi, including custom post types, taxonomies, and template files.
- Installed and configured plugins and third-party integrations, and customized existing themes and plugins to meet project requirements.
- Contributed to performance optimization including caching, image optimization, and database cleanup, and fixed recurring issues to keep sites stable and reliable.

Project Coordinator

Dec 2017 - Nov 2019

Bluemax Services, Mehsana

- Coordinated government-sector projects, managing documentation, tender submissions (nProcure), reporting, and software support, building strong communication and stakeholder-management skills.

Selected Projects

- **nubioage.com** – WooCommerce store build and customization.
- **accessnaturenj.org** – Custom WordPress theme development with custom Gutenberg blocks (ACF).
- **giftoflifehowieshouse.org** – Custom theme build with ACF-powered Gutenberg blocks.
- **resit.com.au** – Figma-to-WordPress conversion and performance optimization.
- **Additional builds:** regencyjewelry.com, liposomae.com, legaciesoflove.org, antheonsuites.gr, gamengrounds.com, formytax.com, stalwartint.com.
