

Lomesh Darji

Flutter Developer

darijlomesh934@gmail.com | +91 9712206339 | Ahmedabad

Flutter Developer with 4+ years of experience building and maintaining production-grade Android and iOS applications across enterprise mobility, fintech, education, healthcare, logistics, and realtime communication domains. Experienced in Flutter, Dart, Firebase, REST APIs, WebRTC, RFID-based workflows, BLE communication, barcode scanning, and offline-first mobile architectures. Successfully delivered multiple applications to the Google Play Store and Apple App Store, including enterprise asset management systems, warehouse operations platforms, realtime communication solutions, educational products, and financial applications. Skilled in MVVM, Clean Architecture, GetX, Provider, Firebase services, and cross-platform application deployment.

PROFESSIONAL EXPERIENCE

Flutter Developer

Webgrapes Pvt. Ltd.

May 2025 – Present

Ahmedabad, Gujarat, India

- Led end-to-end Flutter development of enterprise and production mobile applications.
- Developed SkyTrack RFID Management System independently, including barcode workflows, Zebra printer integration, Bluetooth/BLE/Wi-Fi printing, and ZPL label generation.
- Built and maintained Asset Vision enterprise asset management workflows with API integrations and inventory management features.
- Contributed to Zoo Voice and Premath educational applications focused on child learning and engagement.
- Integrated REST APIs, Firebase services, local storage solutions, and enterprise business workflows.
- Collaborated with backend developers to deliver scalable Android and iOS applications for production environments.

Flutter Developer

iLucent Technolabs

March 2022 – April 2025

Palanpur, Gujarat, India

- Developed and maintained multiple production-grade Flutter applications across fintech, healthcare, education, event management, and realtime communication domains.
- Implemented Firebase Authentication, Firestore, Realtime Database, Cloud Messaging, Storage, Remote Config, and Crashlytics integrations.
- Built realtime messaging and WebRTC-based video communication features for BMINE.
- Developed offline-first mobile workflows using SQLite with server synchronization mechanisms.
- Published and maintained Android and iOS applications through Google Play Store and Apple App Store release processes.
- Mentored junior developers and collaborated within agile development teams of 2–4 developers.

Flutter Intern

iLucent Technolabs

July 2021 – February 2022

Palanpur, Gujarat, India

- Developed and maintained Flutter UI screens, reusable widgets, and responsive mobile interfaces.
- Assisted in REST API integration, JSON parsing, form validations, and application testing.
- Worked with Firebase services including Authentication, Firestore, and local storage solutions.
- Resolved bugs, fixed UI issues, and improved application performance across Android and iOS platforms.
- Collaborated with senior developers, participated in debugging, QA testing, and mobile application release activities.

SKILLS

Flutter Development

Flutter, Dart, Cross-Platform Development, Android, iOS

Architecture & State Management

GetX, BLoC, Provider, MVVM, Clean Architecture

Firebase

Authentication, Firestore, Realtime Database, FCM, Storage, Remote Config, Crashlytics

Realtime Communication

Flutter WebRTC, Video Calling, Realtime Chat, Push Notifications, In-App Messaging

Enterprise Solutions

RFID-Based Workflows, BLE Communication, Barcode Scanning, QR Code Systems, ZPL Label Printing, Inventory Management Systems

API Integration

REST APIs, Dio, HTTP, JSON Parsing, SQLite, Offline Sync, Multipart Uploads

Payments

In-App Purchases, Subscription Management

Tools & Deployment

Git, GitHub, Postman, Xcode, Android Studio, Play Store Deployment, App Store Deployment

PROJECTS

Skytrack

Developed an RFID-based inventory and warehouse management platform using Flutter. Integrated CipherLab RFID scanners for EPC tag reading, implemented BroadcastReceiver-based trigger handling, Zebra RFID printer integration, RFID tag encoding, dynamic ZPL label generation, Bluetooth/BLE/Wi-Fi printing, inventory tracking workflows, and API-based asset validation processes.

BMINE

Developed a realtime dating and communication platform using Flutter, Firebase, and WebRTC. Implemented one-to-one video calling, realtime chat using Firebase Realtime Database, push notifications, subscriptions, in-app purchases, and REST API integrations for a production-ready social communication experience.

Asset Vission

Built an enterprise asset management application focused on RFID-based asset identification, verification, allocation, inventory tracking, and operational workflows. Integrated REST APIs and implemented scalable business processes for asset lifecycle management.

Equevu

Enterprise workplace savings and investment platform featuring secure authentication, Onfido identity verification, UAE Pass integration, biometric authentication, Firebase services, analytics dashboards, and multilingual support.

Host Event

Built a comprehensive event management platform supporting public and private events, ticketing, QR-based event access, Google Maps integration, payments, push notifications, and secure authentication workflows.

Zoo Voice

Educational mobile application for children featuring animal sounds, alphabet learning, quizzes, puzzles, and interactive activities. Implemented Flutter-based offline architecture, AdMob monetization, and engaging learning modules. Achieved more than 100,000 downloads on Google Play Store before removal due to naming copyright issues.

Premath

Child-focused educational application providing interactive mathematical learning through counting games, addition, missing numbers, comparison exercises, sorting activities, multiplication basics, money management games, and logical problem-solving challenges.

Keebee Propane

Business-focused propane delivery and customer management platform. Implemented Flutter UI development, REST API integrations, offline-first architecture using SQLite, and background synchronization mechanisms for field operations.

Meee

Healthcare and wellness application enabling health status tracking, pedometer-based activity monitoring, weekly reports, realtime chat, emergency assistance workflows, push notifications, and Firebase-powered communication features.

ProLearning

Subscription-based educational platform for children featuring structured lessons, quizzes, speech recognition exercises, text-to-speech learning modules, Firebase integrations, offline progress tracking, and premium content access through subscription plans.

EDUCATION

GSHSEB Board, Gandhinagar.
12th (Commerce Stream)

2017

HNGU Patan.
Bachelor of Arts

2020
