CAREER SUMMARY

Frontend Engineer with 4+ years of experience designing and developing scalable, responsive, and high-performance web applications using Angular, React, TypeScript, and JavaScript. Experienced in building reusable component architectures, integrating RESTful APIs, implementing state management solutions, and delivering user-centric interfaces. Strong background in client communication, requirement gathering, code reviews, mentoring junior developers, and independently managing projects from development through deployment. Passionate about writing clean, maintainable code and delivering exceptional user experiences.

TECHNICAL SKILLS

- **Languages:** JavaScript, TypeScript, HTML, CSS
- **Frameworks & Libraries:** Angular, ReactJS, NextJS, NodeJS, Bootstrap, Material, Tailwind UI
- **State Management:** Redux, Redux Toolkit, Zustand, RxJS
- **Tools & Databases:** GitHub, GitLab, MongoDB (Basic Knowledge)
- **Soft Skills:** Client Communication, Team Collaboration, Problem Solving, Code Modularity
- **Spoken Languages:** Gujarati, English, Hindi

WORK EXPERIENCE

Software Developer / *Moon Technolabs - Ahmedabad, Gujarat* / Oct 2025 - Present

- Develop and maintain scalable web applications using Angular, React, TypeScript, and JavaScript.
- Collaborate directly with clients to gather requirements, provide project updates, and deliver business-focused solutions.
- Lead feature development, debugging, performance optimization, and code review activities.
- Mentor junior developers and promote coding best practices across the team.
- Deliver high-quality solutions while ensuring maintainability, scalability, and performance.

Software Developer / *TX Labs - Ahmedabad, Gujarat* / Apr 2024 - Aug 2025

- Developed modern web applications utilizing React.js, Angular, TypeScript, and JavaScript.
- Implemented state management solutions using Redux, Redux Toolkit, and Context API to ensure seamless data flow.
- Integrated RESTful APIs and optimized frontend performance to enhance application speed and responsiveness.
- Built reusable UI components and enhanced user experience using Angular Material and Bootstrap.

Software Developer / *InheritX Solutions Pvt Ltd - Ahmedabad, Gujarat* / Feb 2023 - Feb 2024

- Developed responsive and interactive web applications using React.js and TypeScript.
- Consumed and integrated RESTful APIs to improve application functionality and data synchronization.
- Utilized RxJS for asynchronous programming and complex state management tasks.
- Participated in application architecture discussions and feature implementation planning.

Software Developer / *Wappnet Systems - Ahmedabad, Gujarat* / Sept 2021 - Dec 2022

- Built enterprise-grade Angular applications using TypeScript and JavaScript.
- Developed custom directives, reusable components, services, and pipes to ensure a modular architecture.
- Integrated APIs and enhanced application performance.
- Contributed to modular architecture and reusable code strategies.
- Worked closely with cross-functional team members to maintain high code quality and project standards.

Internship / *Akash Technolabs - Ahmedabad, Gujarat* / Apr 2021 - Aug 2021

- Completed hands-on training in Angular, JavaScript, TypeScript, React.js, and Node.js.
- Assisted in frontend feature development and bug fixing for ongoing projects.
- Gained practical experience in modern web development workflows and version control.

RELEVANT PROJECTS

- **SILQ:** A cloud-based legal practice management application for solicitors and barristers. Developed the frontend architecture using **[React / Angular / NodeJS]** to handle complex matter management, time tracking, trust accounting, and the integration of Anti-Money-Laundering (AML) tools.
- **QDIS FM:** A comprehensive facility management platform encompassing an admin web portal and mobile application. Built the user interface to streamline tenant service requests and optimize vendor workflow assignments using **[ReactJS / NodeJS]**.
- **Dearcows & Admin Panel:** A subscription-based e-commerce platform for organic dairy products. Engineered the admin dashboard and user-facing web application using **[Angular /**

Flutter / NodeJS] to smoothly manage daily, weekly, and monthly automated subscription deliveries.

- **PCB Train & Admin Panel:** An end-to-end manufacturing portal for custom printed circuit board (PCB) fabrication and assembly. Developed the interactive admin dashboard and customer-facing UI to process and track complex manufacturing requirements.
- **T2D2:** A frontend interface for an AI-driven structural damage detection platform. Built the responsive web application using **[Angular / NodeJS]** that allows users to visualize, localize, and classify building damage by interacting with deep-learning computer vision APIs.
- **SEG Shop:** An e-commerce web application developed using **[Angular / Python]** that allows users to browse, customize, and purchase paint and color products online.

EDUCATION

Bachelor of Computer Engineering

Swaminarayan College of Engineering & Technology, Kalol | 2015 – 2019
