SUMMARY

Enthusiastic and motivated Information Technology student with a strong foundation in AI development and software development principles. Proficient in Python, React, SQL, and AI knowledge, with hands-on experience developing academic and personal projects. Familiar with AI-powered development tools such as Claude Code, Antigravity, Codex and Kiro to enhance productivity and problem-solving. A quick learner with strong analytical, communication, and teamwork skills, seeking an opportunity to contribute to innovative software solutions while growing as a software developer.

INTERNSHIP EXPERIENCE

AI Developer Intern – SIXSIGMA TECHNOSOFT

Feb 2026 – Apr 2026

- Developed an AI-powered Resume Generation System using RAG (Retrieval-Augmented Generation) to create personalized resumes from user-provided information.
- Contributed to the development of a Meeting Management Module with features for scheduling, tracking, and managing meetings efficiently.
- Worked on Machine Learning and AI-based applications, including template generation and automation solutions using Python and modern development tools.

PROJECT

AI Template Studio

- Developed an AI-powered platform for creating and managing automation workflow templates.
- Built the frontend using React.js and Tailwind CSS and developed backend APIs with FastAPI.
- Integrated Ollama to generate workflow logic, content, and automation suggestions using natural language prompts.
- Used n8n to design and execute automated workflows through webhooks, triggers, and API integrations.
- Created reusable AI-driven workflow templates for email automation, content generation, and business process automation.

AI Conversational Email Chatbot System

- Developed an AI-powered chatbot that collects email details through conversation and sends emails automatically.
- Built the backend using FastAPI and SQLite, and created an interactive frontend with React.js and Tailwind CSS.
- Integrated local Ollama AI models to generate professional email content based on user requirements.
- Implemented SMTP-based email sending with secure credential handling and session-based authentication.
- Designed the system to protect user privacy by masking sensitive information and avoiding credential storage.

AI Resume Screening & Recruitment Automation System

- Developed an AI-powered recruitment automation system that automatically analyzes PDF resumes and evaluates candidates against job requirements.
- Integrated Ollama (Llama 3) with n8n workflows to extract candidate skills, experience, education details, and generate AI-based candidate scores and recommendations.
- Automated resume processing, candidate ranking, and HR notifications using n8n, reducing manual screening effort and improving recruitment efficiency.
- Built a centralized candidate database using PostgreSQL/Google Sheets for storing applicant information, evaluation results, and recruitment status.
- Implemented automated interview question generation and skill-gap analysis to assist recruiters in conducting technical assessments.
- Designed a scalable workflow architecture using FastAPI and workflow automation tools to streamline end-to-end recruitment operations.

TECHNICAL SKILLS

Programming Languages: Python
Web Technologies: React.js, Tailwind CSS, UI Development
Databases: SQL
AI & Automation: Ollama, n8n Workflow Automation, LLM Integration, Prompt Engineering
AI Development Tools: Claude Code, Antigravity, Codex, Kiro, Copilot
Developer Tools: Visual Studio Code, Git
Security & Auth: SMTP Integration, Session-based Authentication, Secure Credential Handling
Soft Skills: Problem Solving, Team Collaboration, Research & Development, Quick Learner

EDUCATION

B.Tech, Information Technology 2022–2026
GEC Gandhinagar, Sector-28 | CGPA: 8.46

HSC 2020–2022
Sharda Vidhya Mandir | 84%
