SUMM ARY

Results-driven **Full Stack App Developer** with **Overall 2 years of professional experience** in designing, developing, and deploying scalable Android, iOS, and Web applications using **Flutter, Dart, Node.js, Express.js, Firebase, MySQL, MongoDB, and REST APIs**.
Experienced in building enterprise-grade mobile applications with modern architecture patterns including **MVVM, MVC, and Clean Architecture**. Skilled in frontend development, backend API development, database design, authentication, payment integration, cloud services, and CI/CD pipelines.
Hands-on experience working in Agile environments, collaborating with cross-functional teams, and delivering production-ready applications for enterprise clients.

TECHNICAL SKILLS

- **Programming Languages:** Dart,Core Java, JavaScript
- **Frontend Development:** Flutter, React.js, Android SDK, Material Design, Responsive UI Development, Cross-Platform Mobile Application Development
- **Backend Development:** Node.js, Express.js, RESTful API Development
- **Databases:** MongoDB, MySQL, SQLite, Firebase Firestore
- **State Management:** Provider, Riverpod, GetX, BLoC
- **Architecture & Design Patterns:** MVVM, MVC, Clean Architecture, Repository Pattern
- **Cloud & Firebase:** Firebase Authentication, Firebase Firestore, Firebase Cloud Messaging (FCM), Firebase Storage
- **API & Integrations:** REST APIs, Google Maps API, Payment Gateway Integration, WebSocket, Push Notifications
  DevOps, Tools & Platforms: Git, GitHub, CI/CD Pipeline, Jira, Postman, Android Studio, Visual Studio Code (VS Code),
- Xcode, TestFlight
- **Deployment:** Google Play Store Deployment, Apple App Store Deployment
- **Testing:** Unit Testing, Widget Testing, Integration Testing
- **Development Methodology:** Agile Scrum

EXPER IENC E

Full Stack App Developer Cognizant
Technology Solutions March 2025 – Present
Roles & Responsibilities

- Designed and developed enterprise-level cross-platform mobile applications using Flutter and Dart. Developed scalable backend REST APIs using Node.js and Express.js.
- Built secure authentication systems using Firebase Authentication and JWT.
- Designed database schemas using MongoDB and MySQL.
- Integrated third-party APIs including payment gateways, Google Maps, and notification services. Developed reusable Flutter widgets to improve application maintainability.
- Implemented Clean Architecture, MVVM, and Repository Pattern.
- Optimized application performance, reducing API response time and improving UI rendering. Developed role-based authentication and authorization modules.
- Integrated Firebase Cloud Messaging (FCM) for push notifications.
- Automated deployment using CI/CD pipelines.
- Published Android and iOS applications on Google Play Store and Apple App Store.
- Participated in sprint planning, code reviews, estimation, and production deployments.
- Collaborated with UI/UX designers, QA engineers, business analysts, and product owners.

Environment
Flutter, Dart, Node.js, Express.js, Firebase, MongoDB, MySQL, REST APIs, Git, GitHub, Jira, Postman, Android Studio, Xcode, CI/CD, Agile Scrum.

Software Developer Intern
Updatus Inc. Software Pvt. Ltd.
September 2024 – February 2025
Roles & Responsibilities

- Developed responsive Flutter UI for Android and iOS applications.
- Built reusable widgets and custom UI components.
- Integrated Firebase Authentication and Firestore Database.
- Consumed REST APIs for dynamic application data.
- Implemented Riverpod state management.
- Fixed application bugs and optimized performance.
- Participated in Agile ceremonies including sprint planning and code reviews. Used Git, GitHub, Jira, and Postman for project management and API testing.

PROJECTS

1. Enterprise Digital Service Marketplace
Client: Global Digital Services Company (USA)
Role: Full Stack App Developer
Duration: April 2025 – Present
Project Description
Developed a large-scale enterprise service marketplace connecting customers with verified professionals across multiple service categories through Android, iOS, and Admin Portal.
Responsibilities

- Developed Flutter applications for Android and iOS.
- Designed backend REST APIs using Node.js and Express.js. Integrated Firebase Authentication and Firestore.
- Implemented Google Maps API for location-based services. Developed booking management system.
- Integrated Razorpay payment gateway.
- Developed notification system using Firebase Cloud Messaging. Built provider onboarding and verification module.
- Implemented role-based dashboards.
- Optimized database queries and application performance. Collaborated with DevOps team for CI/CD deployment. Published applications to Play Store and App Store.

Technologies
Flutter, Dart, Node.js, Express.js, Firebase, MongoDB, Google Maps API, Razorpay, REST APIs, Git, CI/CD.

EDUCAT ION

Bachelor of Technology (B.Tech) – Artificial Intelligence
G H Raisoni Institute of Engineering & Business Management,
Jalgaon 2021 – 2025
