About Me

Passionate and dedicated MERN Stack Developer with a solid foundation in modern web technologies. As a proactive developer, I have hands-on experience building responsive, high-performance web applications using React.js, Node.js, Express.js and MongoDB. I am proficient in crafting dynamic user interfaces with Tailwind CSS and Bootstrap, while ensuring clean code and optimized performance. Beyond development, I am well-versed in Version Control using Git and GitHub, enabling seamless collaboration within development teams. I have a strong command of building RESTful APIs and managing server-side logic. I am eager to apply my skills to real-world projects and contribute to impactful digital solutions in a professional environment.

Experience

MERN Stack Developer | HiLearn Technology *Jan 2026 – Jul 2026*

- Developed a MERN-based SaaS LMS with multi-role access, dynamic lesson players, and QR-verified certification.
- Engineered an e-commerce layer with Razorpay, Zoom-based live classes, and real-time revenue analytics.

Full Stack Developer Trainee | Felix IT Systems *Dec 2024 – Jul 2025*

- Mastered MERN and RESTful APIs by building responsive UIs with Tailwind CSS and scalable backends.
- Focused on clean code and state management to deliver high-performance apps through industry-level tasks.

Projects

Unified Enterprise EdTech SaaS & Multi-Tenant LMS (MERN Stack)

- Architected a high-performance, unified LMS designed to scale as a SaaS product, serving internal Academy batches and a global public marketplace with distinct onboarding flows.
- Engineered a dynamic lesson player with chapter locking, automated QR-verified certification, and multi-role architecture (Student, Instructor, Admin) via JWT authentication.
- Integrated Zoom SDKs for live classes, automated attendance tracking, and a timed MCQ assessment engine.
- Implemented an e-commerce layer with Razorpay, GST-ready invoicing, and a Super Admin dashboard for real-time revenue analytics.
- Ensured platform integrity with DRM video protection and SEO-optimized dynamic routing for public course pages.

Alexi Smart Learning Platform

AI-powered EdTech platform for children with multi-role system

- Built a full-stack app using React.js (frontend) and Python Flask (backend) with MongoDB Atlas.
- Integrated AI chatbot 'Mimi' (OpenAI & Anthropic APIs) with real-time voice interaction — Speech-to-Text and Edge TTS.
- Implemented face-recognition based student login using OpenCV and the face_recognition library.
- Developed a WhatsApp notification system via Twilio API for automated activity reports and chat transcripts to parents.
- Built multi-role dashboards (Admin, Teacher, Parent, Student); deployed on Railway using Docker.

Tech Stack: React.js, Flask, MongoDB, OpenAI, Anthropic, Twilio, OpenCV, Docker, Railway

Technical Skills

Languages: JavaScript
Styling: Tailwind CSS, Bootstrap
Database: MongoDB, MySQL
Front-end: HTML5, CSS3, React.js, Next.js
Back-end: Node.js, Express.js
Version Control: Git, GitHub

Education & Certificates

Bachelor of Computer Science, Hemchandracharya North Gujarat University *2021 – 2024*

Full Stack Developer Certification — Felix - ITs

Languages Known: Hindi, Gujarati, English
