Darshan Pandya

Mobile Software Engineer | Flutter | Dart | Android & iOS

+91 9427472853 | mailddpandya008@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Mobile Software Engineer with **2+ years of hands-on experience** building and shipping production applications for **Android and iOS** using **Flutter and Dart**. Experienced in taking features from requirements and technical design through implementation, **REST API/Firebase integration**, debugging, release, and production support. Strong in **Clean and modular architecture**, BLoC/Riverpod state management, authentication, subscriptions, push notifications, offline persistence, caching, structured error handling, and performance optimization. Experienced with **Firebase, Supabase, SQLite, REST APIs, and production monitoring**, with a focus on maintainable, reliable, and scalable mobile applications.

PROFESSIONAL EXPERIENCE

VoidVortexTech **Sep 2025 – Present**
Software Engineer – Flutter *India*

- Developed and maintained **5+ Android/iOS applications** using Flutter, contributing across the complete SDLC from feature development and API integration to testing, debugging, and production releases.
- Worked across multiple **application architectures and design patterns**, adapting implementations based on project requirements, scalability, maintainability, and feature complexity.
- Integrated **Node.js REST APIs** for authentication, API communication, request/response handling, error management, and backend-driven application workflows.
- Worked with **Supabase and Firebase** for backend services, database operations, authentication, cloud capabilities, notifications, and application data synchronization.
- Implemented reusable mobile components, state-management solutions, and scalable code structures while maintaining separation of concerns across different application codebases.
- Performed **unit, widget, integration, and manual functional testing** where applicable; reproduced production issues, performed root-cause analysis, implemented fixes, and regression-tested critical user flows before releases.
- Diagnosed **API failures, application crashes, UI/logic defects, and data-related issues** using debugging, logging, testing, and monitoring tools to improve application stability and production reliability.
- Contributed to **backend integration, feature development, bug fixing, performance improvements, and Android/iOS production deployments** across multiple client applications.

Software Engineer – Flutter **July 2024 – September 2025**
factoHR – HR Solution for Growth *India*

- Developed and maintained production **Flutter/Dart applications for Android and iOS**, contributing across feature development, backend integration, debugging, release management, and production support.
- Enhanced the **Resume Builder & CV Maker** application with **3 resume-generation workflows**—manual, AI-based, and LinkedIn-based—and multiple professional templates for flexible resume creation.
- Integrated **5+ Firebase services**, including Firestore, Cloud Functions, FCM, Crashlytics, and Analytics, supporting data workflows, notifications, backend processing, crash monitoring, and product analytics.
- Implemented **subscriptions and in-app purchases** across Android and iOS and supported Google Play Console and App Store production release workflows, issue resolution, and application lifecycle management.
- Integrated **AdMob, Mixpanel, and Smartlook** to support monetization, user behavior analysis, and product insights while resolving UI, functional, and production issues through debugging and root-cause analysis.

PROJECTS

Fleetly – Flutter Mobile Application

- **Tech Stack:** Flutter, Dart, Riverpod, GetIt, Dio, Firebase, Firestore, Firebase Auth, Firebase Storage, FCM, SQLite, RxDart, Freezed, Google Maps, Geolocator
- Designed a maintainable mobile architecture using **Riverpod state management, GetIt dependency injection, Freezed data models, repository patterns, and modular feature separation** to isolate presentation, business, and data-access responsibilities.
- Integrated **Dio-based REST APIs** with structured request/response handling, data mapping, authentication flows, and error management for reliable communication between the Flutter client and backend services.
- Implemented **Firebase Authentication, Firestore, Firebase Storage, and FCM** for authentication, cloud data, media storage, and push notifications across application workflows.
- Implemented **SQLite, SharedPreferences, Firebase persistence, and image/network caching** to support local persistence, offline data access, and improved responsiveness during repeated data access.

- Implemented **Google Maps, Geolocator, Location, and Polyline Points** for location-aware functionality, route visualization, geospatial workflows, and real-time location handling.
- Added **QR code generation, deep linking, local notifications, internationalization, responsive UI components, and structured error handling** to support core mobile workflows across Android and iOS.
- Source Code: GitHub

Resume Builder & CV Maker – Android/iOS

- **Tech Stack:** Flutter, Dart, Firebase Firestore, Cloud Functions, Firebase Cloud Messaging, Crashlytics, Firebase Analytics, In-App Purchases
- Implemented **3 resume-generation workflows**: manual, AI-based, and LinkedIn-based, supporting multiple professional templates across Android and iOS.
- Integrated **5+ Firebase services** covering Firestore data management, Cloud Functions, FCM notifications, Crashlytics monitoring, and Analytics for backend workflows, notifications, crash tracking, and product insights.
- Implemented **cross-platform subscriptions and in-app purchases** and supported production distribution through Google Play Console and App Store release workflows.
- Published production applications on Google Play and App Store.

Krishna Farm Kodki – Android

- **Tech Stack:** Flutter, Dart, REST APIs, Modular Architecture, Atomic Design
- Implemented **modular architecture and Atomic Design** to create reusable UI and application components, improving feature organization, maintainability, and consistency.
- Integrated **REST APIs** with request handling, response parsing, data mapping, validation, and structured error handling to establish reliable communication between the Flutter client and backend services.
- Applied reusable component patterns and structured application layers to support maintainable feature development and consistent UI behavior.
- Published the production application on Google Play.

TECHNICAL SKILLS

Mobile Development: Flutter, Dart, Android, iOS
Architecture & State Management: Clean Architecture, Modular Architecture, Atomic Design, BLoC, Riverpod, Provider, GetX, Dependency Injection, GetIt
Backend & APIs: REST APIs, Firebase, Supabase, Node.js, Express.js, PostgreSQL, MongoDB
Data & Storage: Firestore, SQLite, SharedPreferences, Firebase Persistence, Image Caching, Network Caching
Mobile Services: Authentication, Session Management, Push Notifications, Deep Linking, In-App Purchases, Subscriptions, Payment Integration
Performance & Reliability: Debugging, Root-Cause Analysis, Crash Analysis, API Optimization, Caching, Memory Management, Application Performance Optimization
Testing: Unit Testing, Widget Testing, Integration Testing, API Testing, Postman
DevOps & Release: Git, GitHub, GitHub Actions, Fastlane, Codemagic, Google Play Console, App Store Connect
Programming Languages: Dart, JavaScript, TypeScript, Java
Monitoring & Analytics: Firebase Crashlytics, Firebase Analytics, Mixpanel, Smartlook
Development Tools: Android Studio, VS Code, GitHub, GitLab, Figma

ACHIEVEMENTS

Teaching Assistant — **August 2023 – August 2024**
Darshan University — *India*

- Guided students in **Data Structures, Algorithms, programming fundamentals, and problem-solving**, helping resolve technical challenges through practical examples and debugging.
- Supported students through code reviews, technical guidance, and hands-on assistance, strengthening programming fundamentals and technical problem-solving skills.

EDUCATION

Darshan University — **August 2022 – June 2025**
Bachelor of Technology (B.Tech) — *CGPA: 7.25*

Modi School — **2020**
Higher Secondary / High School — *75%*
