DISHA SATHAVARA

JAVA BACKEND DEVELOPER | SPRING BOOT | REST API DEVELOPMENT

[Mehsana, Gujarat] | [+91 9275173599] | [dishasathavara99@gmail.com] | [Linkedin] | [Github]

PROFESSIONAL SUMMARY

Aspiring Java Backend Developer with practical internship experience in building scalable web applications. Proficient in Java 21, Spring Boot, RESTful APIs, MySQL RDBMS, and JPA/Hibernate. Demonstrated capabilities in layered architecture, server-side validation, and centralized exception handling, with a proven track record of solving technical challenges in high-growth ecosystems like Smart India Hackathon..

EDUCATION

Bachelor of Science (B.Sc Information Technology) | Gujarat Technological University (GTU) [GTU-ITR] | 2024-2027
CPI: 7.66 | Semester 4 SPI: 8.00

Higher Secondary (12th) – General Stream | GSEB | 602/700 (86.00%) | Percentile: 95.82 2024

Secondary (10th) | |GSEB | 502/600 (83.67%) | Percentile: 94.38 2022

TECHNICAL SKILLS

Programming: Java 21, SQL
Backend: Spring Boot, Spring Web, REST APIs Design
Database: MySQL RDBMS, Spring Data JPA, Hibernate ORM
Development: Maven, DTOs, CRUD, Validation, Centralized Global Exception Handling, Layered Architecture
Frontend: HTML, Tailwind CSS, JavaScript, Fetch API
Tools: Git, GitHub, Postman, Swagger/OpenAPI
Core: OOP, DBMS, DSA, REST API Design, HTTP Methods & Status Codes
DSA Practice: Java-based problem solving on LeetCode

PROJECTS

01. E-COMMERCE ORDER MANAGEMENT SYSTEM
Java 21 | Spring Boot | MySQL | JPA/Hibernate | Maven | REST APIs | Swagger/OpenAPI
•Designed and engineered highly efficient RESTful APIs for managing Products, Users, Orders, and OrderItems using Spring Boot.
• Implemented DTOs, validation, exception handling, CRUD, order processing, and stock management.
• Adopted a decoupled Layered Architecture and managed data persistence via Spring Data JPA.
• Documented and tested APIs using Swagger/OpenAPI and Postman; managed development with Git/GitHub.
GitHub → [E-Commerce Project]

02. SMART QUEUE MANAGEMENT SYSTEM
Java | Spring Boot | MySQL | JPA/Hibernate | JavaScript | Tailwind CSS | REST APIs
• Developed a full-stack queue system for token generation, live queue monitoring, and counter operations.
• Implemented REST APIs, unique token generation, waiting-time calculation, validation, and exception handling.
• Built responsive views and dashboards (Customer, Operator) using Tailwind CSS and modern templates.
• stablished backend communications via Fetch API and successfully resolved complex CORS challenges
GitHub / Demo → [Smart Queue project]

INTERNSHIP

Java Intern | SuperTech Software Solution | 22 July 2026 –1 September 2026
• Working on Java and Spring Boot backend development as part of the Smart Queue Management System.
• Applying REST APIs, SQL, database integration, and OOP in a practical project environment.

ACHIEVEMENTS

Internal Smart India Hackathon 2024 – Participant | Gujarat Technological University | September 2024
[Certificate]
