Objective

Looking for a challenging role in a reputable organization to utilise my technical and mathematical skills for the growth of the organization as well as to enhance my knowledge about new and emerging trends in the Data Science

Experience

Maxgen Technology
05-07-2021 - 01-09-2022
Machine Learning Engineer
Worked on time constraint projects efficiently. Performed Exploratory Data Analysis, Data visualization to provide valuable insights.
Trained Machine learning models with high accuracy.
Trained new employees in Python, Machine learning and Deep Learning Served as a punctual, honest
and friendly employee.
Worked well as a team and a individual. Handeled interns as well when needed

Acespritech Solutions
05-09-2022 - 10-02-2023
Machine Learning Engineer
Worked on time constraint projects efficiently. Performed Exploratory Data Analysis, Data visualization to provide valuable insights. Trained Machine learning models with high accuracy and
Flak rest API

Freelancer
15-02-2023 - 01-05-2025
Machine Learning Engineer

Tectona Soft Solution
05-05-2025 -
Data Scientists
Worked on AI-based document extraction using n8n automation workflows. Designed and implemented end-to-end document processing pipelines for PDFs and structured/unstructured
data. Integrated OCR, data parsing, and validation logic to automate business processes. Optimized workflows for accuracy, performance, and scalability while collaborating with cross-functional teams.

Education

Ganpat University
2020
BCA
7.0

Ganpat University
2022
MCA
8.0

Skills

Programming Languages: Python Tools and Packages: Numpy, Pandas, Sklearn, Tensorflow, Keras, Matplotlib, Seaborn Exploratory Data Analysis, Data Visualization, Data Cleaning, Preprocessing, Feature Scaling and Encoding Machine Learning: Supervised (Regression, Classification), Unsupervised (Clustering) Deep Learning: ANN, CNN, RNN AI : N8N Web Scraping knowledge Soft Skills: Public Speaking, Leadership, Team Management, Intern Handling

Projects

Skin Disease Prediction

Skin diseases are conditions that affect your skin. These diseases may cause rashes, inflammation,
itchiness or other skin changes. Some skin conditions may be genetic, while lifestyle factors may
cause others. Skin disease treatment may include medications, creams or ointments, or lifestyle
changes.

Recommended System

Product ID and suggestions using clustering model.

Hand Gesture Detection

Detection, filtering, and normalization to capture main gesture characteristics and fit input gesture
into recognition model

Document Identify and Extraction

Worked on AI-based document extraction using n8n automation workflows. Designed and implemented end-to-end document processing pipelines for PDFs and structured/unstructured
data. Integrated OCR, data parsing, and validation logic to automate business processes. Optimized workflows for accuracy, performance, and scalability while collaborating with cross-functional teams.
