MANOJ HIRPARA

PHP Laravel Developer | Backend Developer

Surat, Gujarat, India | +91 95104 50646 | manojhirpara2001@gmail.com | LinkedIn | Portfolio

PROFESSIONAL SUMMARY

PHP Laravel Developer and Backend Developer with 4+ years of experience designing, developing, and maintaining database-driven web applications, backend systems, and RESTful APIs using PHP, Laravel, CodeIgniter, Node.js, MySQL, and JavaScript. Experienced in API integrations, authentication, database optimization, real-time communication, caching, workflow automation, and administrative platforms. Improved application performance by 50% and reduced unauthorized access attempts by 30% through database optimization and secure authentication practices. Strong problem-solving skills with experience collaborating across backend, frontend, and UI development environments while continuously expanding expertise across modern web technologies.

TECHNICAL SKILLS

Programming Languages: PHP, JavaScript, SQL, HTML5, CSS3
Backend & Frameworks: Laravel, CodeIgniter, Node.js, Next.js, MVC Architecture, Server-Side Development, Business Logic
APIs & Integrations: RESTful APIs, JSON, Meta APIs, WhatsApp API, Third-Party API Integration, WebSockets
Databases: MySQL, PostgreSQL, Database Integration, Query Optimization, CRUD Operations
Frontend Technologies: React.js, Next.js, Livewire, jQuery, Ajax, Bootstrap, Responsive Web Development
Performance & Real-Time: Redis, Caching, Database Optimization, Load-Time Optimization, Real-Time Communication
Security: Secure Authentication, Role-Based Access Control, Authorization, Application Security
Automation & Development Tools: n8n, API Workflow Automation, Git, GitHub, Visual Studio Code, Cursor, Magento
AI-Assisted Development: ChatGPT, Claude, Debugging, Code Optimization, Feature Implementation

PROFESSIONAL EXPERIENCE

Web Developer | Moneymantra Research August 2025 - August 2026 | Surat, Gujarat, India

- Optimized existing Node.js backend APIs by integrating Redis caching and Socket/WebSocket functionality to improve application performance and enable real-time communication.
- Automated public API data processing through n8n workflows, implementing database insert and update operations to streamline incoming data synchronization.
- Independently developed a WhatsApp Business Management Panel similar to AiSensy, implementing core WhatsApp API management and automation functionality.
- Transitioned from Laravel-focused development to extensive Node.js backend development while maintaining and enhancing production web applications and backend services.
- Developed and maintained Laravel and CodeIgniter applications, implementing backend modules, business logic, CRUD functionality, and database-driven features.
- Built an administrative order-tracking panel with map integration to visualize order distribution across states and support operational monitoring.
- Optimized database interactions and implemented reusable CRUD functionality to improve backend maintainability, data handling, and application efficiency.

Senior Developer | Kareliya Infotech June 2022 - August 2025 | Surat, Gujarat, India

- Developed custom database-driven web applications using PHP, Laravel, MySQL, and JavaScript, translating functional requirements into maintainable backend modules.
- Designed and implemented RESTful APIs to support structured frontend-backend communication and reliable data exchange across web applications.
- Optimized MySQL queries and database operations to improve application performance, responsiveness, and page load times.
- Collaborated with UI and frontend teams to integrate backend functionality and deliver consistent application workflows and user experiences.
- Developed web application functionality using PHP, MySQL, and JavaScript while maintaining existing modules and implementing feature enhancements.
- Worked with the Magento framework to support e-commerce application development and backend functionality.
- Diagnosed application issues and implemented debugging, feature enhancements, and deployment-related updates across web applications.

SELECTED PROJECTS

NRPOKER | PHP, Laravel, MySQL

- Developed a backend administration panel for an online multiplayer poker platform, supporting centralized management of core platform operations.
- Implemented management modules for users, game tables, transactions, and chips using Laravel and MySQL.
- Integrated role-based access control and secure administrative authentication to restrict access to authorized platform operations.
- Added dynamic search and multi-column sorting capabilities to improve administrative data management and usability.

KOSOL | PHP, Laravel, MySQL, Livewire

- Developed the complete backend for kosolenergie.com using Laravel and MySQL, including authentication and secure administrative access.
- Built reactive administrative modules using Livewire to support dynamic data management and improve the usability of backend workflows.
- Implemented SEO-friendly administrative functionality while maintaining scalable backend architecture and performance-focused database interactions.

NORTHERN STAR | PHP, CodeIgniter, MySQL

- Developed an administrative panel with map-based order visualization to support operational tracking and geographic order monitoring.
- Implemented CRUD functionality for backend data management and streamlined administrative workflows.
- Optimized database interactions to improve backend responsiveness and application efficiency.

MONEYMANTRA4X | Node.js, React.js, PostgreSQL, Redis, WebSockets, n8n

- Developed and enhanced Node.js backend APIs supporting communication between the administrative panel and React.js frontend.
- Integrated Redis caching and Socket/WebSocket functionality to support real-time communication between application components.
- Configured public APIs through n8n workflows and implemented automated database insert/update operations for incoming API data.
- Integrated backend API responses into React.js components and developed responsive website sections for frontend data presentation.

DEVARSHI CAFE | Next.js, PostgreSQL

- Developed a responsive single-page website using Next.js with frontend and backend functionality implemented within the application.
- Implemented responsive frontend sections and application functionality with emphasis on usability and cross-device presentation.
- Utilized AI-assisted development tools including ChatGPT and Claude for feature implementation, debugging, optimization, and development support.

CRM MONEYMANTRA4X | Next.js, Meta APIs, WhatsApp API, Vercel

- Developed a Next.js-based CRM platform focused on WhatsApp messaging, template management, lead generation, and user interaction tracking.
- Integrated Meta APIs and WhatsApp API to support messaging, template management, user data retrieval, chat, and communication functionality.
- Created a dedicated Devarshi Cafe channel with a custom menu connected to the website frontend, enabling website-generated leads and interactions to be managed through the CRM.
- Enhanced the Vercel-hosted Next.js application through feature implementation, debugging, optimization, and AI-assisted development using ChatGPT and Claude.

EDUCATION

Bachelor of Computer Application (BCA) 2020 - 2022

Veer Narmad South Gujarat University (VNSGU) | GPA: 7.59
