PROFILE SUMMARY

Motivated Computer Engineering undergraduate with strong interests in **Python, Flutter, Artificial Intelligence, Lovable, UI/UX, Web Development, and App Development**, complemented by hands-on experience in **Flutter application development and modern web technologies**. Passionate about research-driven problem solving, scalable software design, and applying AI techniques to real-world applications. **Eager to learn new technologies, explore emerging AI/ML solutions, and contribute to innovative web and mobile application development.**

Technical Skills

Programming Languages: Python, Dart, JavaScript, TypeScript, SQL
Web Development: HTML5, CSS3, JavaScript, TypeScript, React.js, Django, MERN Stack
Mobile Development: Flutter, Dart, Firebase, REST API Integration
AI/ML: Python, PyTorch, TensorFlow, scikit-learn, OpenCV
Frameworks/Libraries: Flutter, React.js, Django, FastAPI, PyTorch, TensorFlow, scikit-learn
Databases: MySQL, Firebase, Supabase
Tools Platforms: Git, GitHub, Docker, Postman, Lovable, Claude, ChatGPT, Gemini
UI/UX: Figma, Wireframing, Prototyping, Responsive UI Design
Core Knowledge: DSA, OOPS, DBMS, API Integration, Software Development, AI-Assisted Development

EDUCATION

L.J. UNIVERSITY, Ahmedabad *Jul 2022 – Jun 2026*
B.E, Computer Engineering Department *CGPA : 8.12*

Work Experience

TGH World Wide (Remote) Ahmedabad, Gujarat

AI Developer *July 2026 – Present*
• Developed modern web applications using **vibe coding and AI-assisted development with Lovable**, focusing on rapid prototyping and scalable solutions.
• Worked on **UI design, API integration, databases, and automation** to build functional and user-friendly applications.
• Leveraged AI tools to accelerate development, debugging, and product prototyping workflows.

Furrisic Infotech Ahmedabad, Gujarat

Flutter Developer *Dec 2025 – March 2026*
• Developed and maintained **Flutter applications** for live projects with responsive UI and efficient application performance.
• Integrated **REST APIs and databases** to build dynamic and data-driven mobile applications.
• Implemented UI components and **state management** while contributing to debugging and feature development.

Indian Institute of Technology (IIT) Mandi – Research Intern (Remote)

Advisor: Prof. Durgesh Ameta *Nov 2025 – Dec 2025*
• Extracted and prepared **word-level EEG features** for Seq2Seq EEG-to-text frameworks.
• Implemented reproducible **dataset loaders** for model training and evaluation.
• Assisted in research on **open-vocabulary EEG-to-text decoding**.

Excelsior Technologies Ahmedabad, Gujarat

Flutter Developer *Dec 2024 – Sep 2025*
• Developed mobile applications and games using **Flutter and Dart**, focusing on responsive UI, smooth animations, and user experience.
• Worked on **API integration, Firebase, databases, and state management** across multiple projects.
• Developed and deployed multiple games including **SlydlePuzzle, Crossword, Rollout, and MindMine** on the **Google Play Store**.

Projects

AI-Powered Digital Marketing Content Platform — JavaScript, TypeScript, Supabase

• Developed an AI-powered platform for generating **marketing banners, short videos, GIFs, and carousel content**.
• Built **campaign management and customizable template** features to streamline digital marketing workflows.
• Implemented **brand asset management** for uploading and managing logos, images, icons, and other reusable assets.
• Designed a responsive and user-friendly interface with **Supabase backend integration** for data management and application functionality.

Keshar Packaging — TypeScript, JavaScript, Lovable — Live Business Website

• Designed, developed, and deployed a **live business website** for Keshar Packaging using **TypeScript and JavaScript** with Lovable-powered **vibe coding and AI-assisted development**.
• Built a modern, responsive, and user-friendly web interface with a focus on **UI design, responsive layouts, and seamless user experience** across devices.
• Transformed business requirements into a **production-ready website** using rapid prototyping and AI-assisted development workflows.

Recipe Management Platform — React.js, Django, SQLite, JWT — GitHub

• Developed a **full-stack recipe management platform** using React.js and Django for creating, organizing, and managing recipes and ingredients.
• Implemented features for users to **add, edit, search, and organize recipes**, including ratings, instructions, and pantry information.
• Integrated **JWT-based authentication** to provide secure user access and protected application functionality.
• Designed an intuitive and responsive interface focused on improving the overall **user experience and recipe management workflow**.

ChatHive – Real-Time Chat Messaging Application — Flutter, Firebase — GitHub

• Developed a **real-time messaging application** using Flutter and Firebase supporting **one-to-one chat, group chat, text and image messaging, and profile management**.
• Implemented advanced messaging features including **reply, pin, star, read/unread status, message delivery indicators, and 24-hour status updates with status replies**.
• Developed **group admin controls** for managing group access and members, along with responsive UI and Firebase-based real-time data synchronization for a seamless communication experience.

Personal AI-Powered Voice Assistant — Python, Gemini API, SpeechRecognition, gTTS, Pygame, Webbrowser, Subprocess — GitHub

• Developed an **AI-powered voice assistant** using Python and Gemini API to understand natural voice commands and provide intelligent responses.
• Integrated **speech recognition and text-to-speech** capabilities for interactive voice-based communication.
• Implemented automation features including **web search, application control, and system-level task execution** using Webbrowser and Subprocess.

Key Achievement/Certificates

• Data Structures, Discrete Mathematics, Coding Achievements On GFG and HackerRank
• Kaushalya - The Skill University Python Certificate
• Coursera - IBM - Data Analysis for Machine Learning Certificate
• Kaggle with GOOGLE Ai-Agent Certificate
• JPMorgan - Software Engineering Job Simulation Certificate
