Sankhala Ankit Pareshbhai

(+91) 9328586198 ankitsankhala617@gmail.com ankit-Sankhala7 AnkitSankhala07

Professional Summary

Computer Science & Design undergraduate with experience in Full-Stack Web Development and AI applications. Skilled in React.js, Node.js, Express.js, Django, Python, MongoDB, PostgreSQL, and LangChain. Built web applications, REST APIs, and AI-powered tools using LLM APIs.

Education

G.H. Patel College of Engineering and Technology, Anand **Jun 2023 – May 2027**

Bachelor of Technology (B.Tech) in Computer Science & Design

- GPA: 7.76

Technical Skills

AI : Prompt Engineering, LLM APIs (OpenAI/Gemini), LangChain
Languages: Python, JavaScript, TypeScript
Frontend: React.js, HTML5, CSS3
Backend: Node.js, Express.js, Django
Databases: MongoDB, PostgreSQL
Concepts: REST APIs, CRUD Operations, Authentication, MVC Architecture
Tools: Git, GitHub, VS Code, Figma

Projects

Herb and Spice POS - SaaS Restaurant Management Platform | *React.js, Node.js, Express.js, MongoDB* **2026**

- Developed a full-stack SaaS restaurant management platform for multi-restaurant operations with a multi-tenant architecture and isolated tenant data.
- Built role-based modules for owners, admins, waiters, kitchen staff, and customers with secure authentication and authorization.
- Implemented core restaurant workflows including menu management, order processing, table management, inventory tracking, and analytics dashboards.
- Integrated real-time order updates using Socket.IO to enable seamless communication between kitchen and front-of-house staff.
- Added QR-based table ordering, forecasting, and subscription/trial billing support through Stripe to enhance operational efficiency.

AI Customer Support Platform (RAG + Agentic AI) | *Python, FastAPI, React.js, TypeScript, LangChain, PostgreSQL* **Apr 2**

- Built an AI-powered customer support platform capable of answering queries from enterprise documents using Retrieval-Augmented Generation (RAG).
- Integrated semantic search with ChromaDB vector database for accurate context retrieval and low-latency responses.
- Developed autonomous AI agents to retrieve knowledge, generate responses, escalate unresolved issues, and create support tickets automatically.
- Designed secure JWT authentication, role-based authorization, and REST APIs using FastAPI.

AI Code Review & Security Analyzer | *Python, FastAPI, React.js, TypeScript, MongoDB* **Sep 2026 – Oct 2026**

- Developed an AI-powered code review platform that automatically analyzed source code for bugs, security vulnerabilities, and performance bottlenecks.
- Integrated GitHub APIs to fetch repositories, analyze pull requests, and generate AI-assisted code review reports.
- Built FastAPI backend services to process repositories, manage analysis jobs, and expose RESTful APIs for frontend integration.

Certifications

Generative Models for Developers | *Infosys Springboard* **Apr 2026**

Introduction to Artificial Intelligence | *Infosys Springboard* **Apr 2026**

CVM University Hackathon 2026 – Participant | *CVM University* **Mar 2026**
