Professional Summary

Front-End Developer with **1.5 years of hands-on experience** in developing responsive and scalable web applications using HTML5, CSS3, JavaScript, and React.js. Skilled in building reusable UI components, REST API integration, authentication flows, state management, and responsive interfaces. Experienced in developing real-world management systems, admin panels, and service platforms with a focus on performance optimization, usability, and user experience.

Technical Skills

Front-End: React.js, JavaScript (ES6), WordPress, AngularJS, HTML5, CSS3, Tailwind CSS, Bootstrap

State Management: Redux Toolkit, Context API

Authentication: Firebase Authentication, JWT

API & Integration: REST APIs, API Integration, Postman

SEO: On-Page SEO, Technical SEO, Google Search Console, Google Analytics, Keyword Research

Tools & Platforms: Git, GitHub, GitLab, Postman, VS Code, MS Excel

Design: Figma

Experience

Purvsoft Technologies **February 2025 – Present**
Front-End Developer *Ahmedabad, Gujarat*

- Developed responsive and scalable web applications using **React.js, JavaScript, HTML5, and CSS3**.
- Built reusable frontend components and modules for housekeeping management, payroll systems, employee dashboards, and administrative applications.
- Integrated **REST APIs** and handled frontend-backend data communication for dynamic application features.
- Implemented responsive layouts and optimized applications for desktop, tablet, and mobile devices.
- Improved website performance, SEO structure, accessibility, and overall user experience.
- Implemented state management using **Redux Toolkit and Context API** where required.
- Performed debugging, API testing, and UI optimization using **Postman** and browser developer tools.
- Collaborated with backend developers for API integration, application testing, and deployment.

Projects

Project Management System | React.js, JavaScript, Tailwind CSS, REST APIs

- Developed a responsive project management system for managing projects, employees, tasks, attendance, and operational activities.
- Built reusable dashboard components and role-based interfaces for **Admin, HR, and Employee** users.
- Developed modules for project management, employee management, task tracking, attendance, leave management, and dashboard reporting.
- Integrated REST APIs for creating, updating, retrieving, and managing application data.
- Implemented responsive layouts and reusable UI components using React.js and Tailwind CSS.
- Performed API testing, debugging, and frontend validation using Postman and browser developer tools.

Car Management System | React.js, JavaScript, Bootstrap, REST APIs

- Developed a web-based car management system for managing vehicle information and administrative operations.
- Created responsive interfaces for car listings, vehicle details, management records, and administrative workflows.

- Implemented reusable React components for forms, tables, cards, filters, and data management.
- Integrated REST APIs for retrieving and updating vehicle and application data.
- Implemented form handling, validation, search, filtering, and responsive UI functionality.
- Tested application features and resolved UI and API-related issues to improve usability and reliability.

Admin Panel / Management Dashboard | React.js, JavaScript, Redux Toolkit, REST APIs

- Developed an admin panel for managing users, services, records, and application data through a centralized dashboard.

- Built reusable components for tables, forms, modals, navigation, dashboards, and management screens.
- Implemented CRUD-based interfaces for adding, viewing, editing, and deleting application records.
- Integrated REST APIs and managed frontend application state using Redux Toolkit.
- Implemented responsive dashboard layouts for different screen sizes.
- Performed debugging, API testing, and UI optimization to ensure smooth application performance.

JP Home Service Platform | React.js, JavaScript, REST APIs, Postman

- Developed and maintained a web-based service platform connecting customers with professional household service providers including housekeeping, cooks, drivers, babysitters, and office boys.
- Designed responsive interfaces allowing customers to browse services, view worker profiles, and submit service booking requests.
- Implemented service listings, worker details, booking management, and customer inquiry forms.
- Performed API testing using Postman to verify request and response data between frontend and backend systems.
- Improved UI performance and mobile responsiveness to deliver a seamless user experience across different devices.

Sunway Solutions – Facility Management System | React.js, JavaScript, Bootstrap

- Developed a web-based Facility Management system for managing housekeeping services, payroll operations, and staff management.
- Built responsive interfaces for employee records, attendance tracking, and service assignments.
- Implemented payroll-related UI modules including salary details and employee information management.
- Conducted website testing and debugging to ensure proper functionality and usability of application modules.
- Applied responsive design and SEO-friendly page structures to improve usability and accessibility.

Education

Silver Oak University **2022 – 2025**
Bachelor of Computer Applications (BCA) *Ahmedabad, Gujarat*

Certifications

Tops Technologies – Front-End Development
