- Postman (API Testing – Entry Level)
- Task Management Systems
- HTML (Basic)

WORK EXPERIENCE

Quality Assurance Engineer

Kachhua Solutions Pvt. Ltd. | June 2023 – Present

- Planned tests, wrote test cases, and closed testing for several projects.
- Wrote clear test cases based on business requirements to cover all features.
- Tracked bugs from start to finish and worked with developers to fix them quickly.
- Did Regression, UI/UX, Sanity, Smoke, UAT, Web, Responsive, and GUI testing.
- Joined daily stand-up meetings and followed STLC steps during each release.
- Talked directly with developers, business analysts, and support teams to clear up requirements and fix issues.
- Did basic API testing using Postman to check backend functionality.
- Managed a QA team and made sure projects were tested well and delivered on time.
- Reviewed project goals and schedules to plan testing needs in advance.

PROJECT WORK

- Worked on and delivered several products in e-learning, CRM, ERP, and CMS projects.
