PROFESSIONAL SUMMARY

AI/ML Engineer with hands-on industry experience in building practical, data-driven solutions. Currently working at Finbyz Tech Private Limited, where I design and implement machine learning models, automation workflows, and AI-powered features used in real business applications.

WORK EXPERIENCE

FINBYZ TECH PRIVATE LIMITED :Ai/Ml Engineer May 2025 -Present

- Worked at Finbyz Tech Private Limited on building and maintaining n8n workflows for business process automation.
- Handled Python-based logic and integrations with ERP software to streamline operations and improve data flow.

XCELCODE INNOVATIONS LLP. :Data Science Intern Dec 2024- April 2025

- Worked with Python, FastAPI, and PostgreSQL to build and support real-world applications.
- Contributed to the AI Artisan project by developing image generation and face swapping features for virtual outfit try-on.

SKILLS

- **Programming & Frameworks:** Python, FastAPI, Transformers(HugingFace), OpenCV , ERP Workflows,Node.Js,React.Js
- **Machine Learning & AI:** Machine Learning, Deep Learning, Artificial Intelligence, Generative AI, LLMs (Large Language Models), AI Agents ,RAG
- **Database:** PostgreSQL,VectoreDB
- **Tools&Technologies:** Git, GitHub, Linux,Docker, Postman,n8n
- **Model Training & Fine-tuning:** Face Swap (InsightFace,Facefusion), Diffusion Models (AI Artisan)

PROJECTS

AI Artisan

- Developed a system to generate realistic outfit visuals on avatars by applying user-provided clothing images with accurate pose handling for virtual try-on use cases.

FaceSwap AI

- Built a face swap pipeline using Python that ensures accurate face alignment, natural restoration, and high-quality outputs while preserving facial identity across different lighting and angles.

Smart Card Scanner

- Developed a Smart Card Scanner workflow at Finbyz Tech that creates and updates ERPNext CRM contacts directly from business card images sent via Telegram.
- Automated duplicate checks and lead/contact creation to save time, reduce errors, and keep ERP data accurate.

Knudge

- Designed and built Knudge, a cross-platform relationship and brand management system that brings messages from WhatsApp, LinkedIn, Email, and Signal into one workflow.
- Implemented draft-first messaging, u nified contact context, and swipe-based execution using FastAPI, Matrix, and mobile app integration.

EDUCATION

B.E. -Information Technology 2021 - 2025

- GujaratTechnological University - **CGPA : 8.06**
